Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. These claims are inferential and insufficiently positively recite structural features and relationships to support a clear structure basis by which applicant's invention can be compared with the prior art. Since the claims are lacking in adequate positive recitation of the essential structural features and relationships of the device, it is difficult to determine with any degree of certainty, the precise structural combination intended to be covered by each of these claims. All essential structural elements should be positively recited, and the structural relationships between these elements and parts which provide for a useful and operative device should be positively and clearly set forth. Claim 2 is vague and indefinite. The scope of the claim should be positively claimed.

Claim Rejections - 35 USC § 102

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Angermaier (US 5 613 473).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3747

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

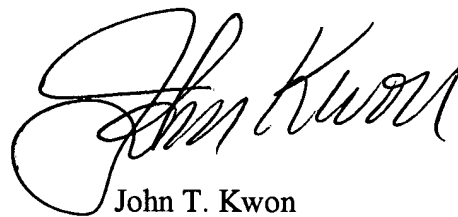

Claims 2-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Angermaier (US 5 613 473) in view of Ahrens (US 4 281 256). Angermiser discloses an internal combustion engine with the cylinders, a control unit to control the fuel injection or ignition in order to alter the unit stroke sequence (Abstract lines 10-12). However, Angermiser does not show the use of a compressed air storage reservoir. Ahrens shows that the provision of a compressed air storage reservoir in an internal combustion engine is old and well known in the art. Since the prior art references art from the same field of endeavor, the purpose disclosed by Ahrens would have been recognized in the pertinent art of Angermaier. Therefore, it would have been obvious at the time the invention was made to a person having ordinary skill in the art to provide the device of Angermaier with the compressed air storage reservoir as taught by Ahrens.
